

MOHANISH PINGALE

Full Stack Developer

8830121592 | mpingale31@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

SUMMARY

Enthusiastic Full Stack Developer skilled in building responsive, scalable, and user-friendly web applications using the MERN stack. Experienced in developing RESTful APIs, implementing authentication and database logic with Node.js and MongoDB, and creating dynamic frontends with React.js. Strong foundation in modern JavaScript, clean coding practices, and version control using Git. Passionate about problem-solving, learning new technologies, and delivering impactful digital experiences.

TECHNICAL SKILLS

Frontend Development: HTML5, CSS3, JavaScript (ES6+), TypeScript, React.js, Bootstrap, Redux, Responsive Web Design

Backend Development: Node.js, Express.js, MongoDB, REST APIs (JavaScript/TypeScript)

CS Fundamentals: Data Structures & Algorithms, OOPs
Solved 150+ DSA problems on LeetCode & Codeforces

Tools & Technologies: Git & GitHub, Postman, Docker, Linux

EXPERIENCE

Indux Technology

02/2026 - Present

Full Stack Developer Intern:

MagikPro / Nutri Native Foods E-Commerce Platform:

- Contributed to the development of a multi-brand E-Commerce + CRM platform supporting two brands under a single unified admin system with dynamic brand-based content rendering.
 - Implemented key features including product management, cart functionality, and order workflow, ensuring proper separation of brand-specific data and UI.
 - Worked with Next.js (TypeScript), Node.js, MongoDB, Tailwind CSS, and integrated Razorpay payment workflows within the platform.
 - Participated in client meetings to discuss new requirements, product improvements, and feature planning, contributing technical input during implementation discussions.
-

PROJECTS

QKart (Full Stack E-commerce)

09/2024 - 10/2024

Full Stack E Commerce Application:

- Developed and integrated a complete set of RESTful APIs for QKart, an e-commerce application, implementing core modules such as authentication, shopping cart, and checkout using Node.js and MongoDB following best practices.
- Built and tested scalable backend architecture leveraging MongoDB (NoSQL) for data persistence and ensured reliability through comprehensive unit and integration testing.
- Enhanced the frontend experience by implementing responsive design and dynamic data rendering via REST API integration, ensuring a seamless and consistent user experience across devices.

Responsive News Feed Interface using multiple technologies:

- Developed reusable JavaScript modules for accordion and carousel interactions, centralizing DOM selectors and logic to improve maintainability and reduce breakage during UI updates.
- Extended baseline navigation utilities in basePage and combined them with modular components to streamline end-to-end coverage.
- Validated Flipboard RSS feeds via data-driven specs using curated magazine URLs to ensure consistent content rendering in automation runs.

Web pages with interactive features and responsive design:

- Built a full-stack travel booking app (MTripDynamic) with an Express/LowDB backend exposing REST endpoints (/cities, /adventures, /reservations) and a modular frontend.
- Implemented reservation flows and CRUD-style adventure management, including availability toggling, cost calculation, and dynamic random data generation via nanoid and dayjs.
- Optimized frontend modules to consume the backend APIs, delivering responsive city/adventure listings and reservation dashboards powered by static assets in frontend/pages and css.

EDUCATION

Bachelor of Technology in Computer Science & Design
MET Institute of Technology

08/2022 – 07/2025

Diploma in Mechanical Engineering
Sandip Polytechnic

06/2019 - 05/2022
