ABOUT ME

Full Stack Developer with production experience building scalable MERN stack and Next.js applications. Skilled in RESTful API design, JWT-based authentication, and responsive frontends. Delivered real-world features across e-commerce and crypto portfolio platforms. Solved 150+ DSA problems; strong in clean code practices and full-cycle development ownership.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3

Frontend: React.js, Next.js, Redux, Redux Toolkit, RTK Query, Bootstrap, Tailwind CSS, Responsive Web Design

Backend: Node.js, Express.js, REST API Design, JWT Authentication, CORS, HttpOnly Cookies

Databases: MongoDB (NoSQL), Mongoose ODM

Tools & Platforms: Git, GitHub, Docker, Postman, Linux, Vite

APIs & Integrations: CoinGecko API, Razorpay Payment Gateway, Flipboard RSS

CS Fundamentals: Data Structures & Algorithms, Object-Oriented Programming (OOP)

EXPERIENCE

Indux Technology

Feb 2026 – Present

Full Stack Developer Intern

Remote

- Engineered a **multi-brand E-Commerce + CRM platform** (MagikPro / Nutri Native Foods) supporting two brands under a single unified admin system with dynamic, brand-based content rendering.
- Implemented core commerce modules – **product management, cart functionality, and complete order workflow** – with strict brand-level data separation ensuring security and consistency.
- Integrated **Razorpay payment workflows** within the platform, enabling reliable and secure checkout transaction handling.
- Participated in **client-facing requirement meetings**, providing technical input that directly shaped feature planning and implementation decisions.
- Tech Stack:** Next.js (TypeScript), Node.js, MongoDB, Tailwind CSS, Razorpay API

PROJECTS

Grove Crypto Tracker | React, TypeScript, Redux Toolkit, Node.js, Express.js, MongoDB

Feb 2026 – Mar 2026

- Built a **full-stack cryptocurrency portfolio tracker** with real-time market data via the **CoinGecko REST API**; implemented **in-memory server-side caching** that reduced outbound API calls by 60%, cutting latency on repeat requests and staying within free-tier rate limits.
- Implemented **JWT authentication with HttpOnly cookies**, protected route guards, and secure cross-origin session handling – ensuring robust security across distributed deployments.
- Designed **12+ RESTful APIs for full portfolio CRUD operations** with in-memory caching to reduce external API load and improve response times.
- Managed global application state using **Redux Toolkit + RTK Query**, reducing prop-drilling across 8+ components and cutting redundant fetch calls through automated cache invalidation.

QKart – Full Stack E-Commerce Application | Node.js, Express.js, MongoDB, React.js

Sep 2025 – Oct 2025

- Developed a complete **RESTful API suite** authentication, shopping cart, and checkout covering **90%+ of core business logic** with unit and integration tests, validating correctness and regression safety before deployment.
- Architected a **scalable NoSQL backend** using MongoDB, with reliability validated through comprehensive unit and integration testing.
- Provided a **responsive, device-agnostic frontend** with dynamic REST API integration for a seamless user experience across all screen sizes.

MP's News Feed | JavaScript, HTML5, CSS3, Automation Testing

Aug 2025

- Built a **responsive news feed interface** with reusable JavaScript modules for accordion and carousel interactions, centralizing DOM logic to reduce UI breakage.
- Validated Flipboard RSS feeds using **data-driven automation specs** with curated magazine URLs, ensuring consistent content rendering across automated test runs.

EDUCATION

MET Institute of Technology

Aug 2022 – Jul 2025

Bachelor of Technology in Computer Science & Design

Sandip Polytechnic

Jun 2019 – May 2022

Diploma in Mechanical Engineering

ACHIEVEMENTS & ACTIVITIES

Competitive Programming: Solved **150+ DSA problems** on LeetCode and Codeforces, with focus on arrays, trees, dynamic programming, and graph algorithms.

Production Contribution: Contributed to a live, client-facing multi-brand platform serving real users at Indux Technology.

End-to-End Ownership: Independently shipped full-stack projects from database schema design to frontend UI, demonstrating initiative and full-cycle development capability.
